

Digital Whiteboard

Model: HCI-WB

HIGHLIGHTS

- ▶ Branding (Logo, tagline, etc.)
- ▶ Room and Patient Information
- ▶ Medical Team Details and Contact Information
- ▶ Patient Updates and Notifications
- ▶ Daily Goals for the Patient

ABOUT THE INTERACTIVE DIGITAL WHITEBOARD

Almost all hospitals and facilities have a whiteboard in the patient's room and typically are used for scheduling, patient updates, and medical staffing information. HCI's Interactive Whiteboard can do that and more. This innovative communication tool, which can integrate with your facilities medical records, can help organize and increase the efficiency of your staff. You can keep the patient, family and caregivers informed and aligned in every step. In return, the satisfaction of the patient and caregivers will increase and the facility's HCAHPS will improve.

The Whiteboard has a 22" touch screen display that is flexible and can be customized to your facilities branding and needs. Underneath the screen is a magnetic glass dry erase board that can be written on with more detailed information.

Customizeable Patient View

HCI MediaCare System Compatible

SPECS

PRODUCT SPECS

- ▶ Model Number: HCl-WB
- ▶ Color: White
- ▶ Dimensions: 23" x 20.5" x 1.2" *
- ▶ Weight: 19.5 lbs
- ▶ Shipping Weight: 25 lbs
- ▶ VESA Pattern: 400mm x 400mm

VIDEO ENHANCEMENTS

- ▶ Screen sizes: 18.75"x10.5"; 21.5" Diagonal
- ▶ Display type: LCD with LED Backlight
- ▶ Display resolution: 1920 X 1080
- ▶ Color depth: 16.7 million (8 bit)
- ▶ Aspect ratio: 16:9
- ▶ Luminance: 250 cd/m2
- ▶ Contrast ratio: 1000:1
- ▶ Viewing angle: 170/170
- ▶ Response Time: 5ms

INPUTS

- ▶ Input signal: ATSC, NTSC, Composite, HDMI, USB, Clear QAM, RJ45, HDTV
- ▶ Physical Inputs: RF, USBx3, HDMI, Composite AV, VGA
- ▶ Communication: Ethernet, USB, WiFi 802.11 b/g/n, Bluetooth
- ▶ POE Capable: Yes

POWER

- ▶ Source: 120V AC 50/60Hz
- ▶ Consumption: 25W
